Vũ Thành Tuyên

AI Research Engineer.
Dedicated to advancing AI with expertise in ML, Deep Learning, and LLMs.
Developing and deploying production-grade AI systems and leading research initiatives.
Goal: Tech Lead in AI Research.

2. Professional Summary

- Highly responsible and dedicated **AI Research Engineer** with a robust background in **Machine Learning, Deep Learning, and Large Language Models (LLMs)**.
- Proactively explores cutting-edge research, engages in self-learning, and translates innovative solutions into practical, real-world applications.
- Experienced in developing and deploying **production-grade AI systems** and building complex **multi-agent frameworks**.

> *My goal is to advance into a **Tech Lead role in AI Research**, leveraging my technical proficiency and leadership skills to*

3.1. AI Research Engineer, HBLAB | May 2025 – Present

Extractor Date (Japanese Medical Data Agent)

Developed a Japanese medical data extraction agent using the OpenAI API, achieving **87% accuracy** through specialized domain-specific data processing and rigorous evaluation.

GenQuestion (Testcase Generation Agent)

Engineered automated test and Quality Assurance (QA) question generation agents based on project specifications, leading to a significant reduction in QA workload. The solution was highly rated (**9/10**) by QA Leads.

GenQuestion (Testcase Generation Agent)

Engineered automated test and Quality Assurance (QA) question generation agents based on project specifications, leading to a significant reduction in QA workload. The solution was highly rated (**9/10**) by QA Leads.

3.2. AI Research Engineer, Viettel Cyber Security | Dec 2023 – May 2025

MLOps Experience (Airflow, MLflow, MinIO)

Established scalable LLM training pipelines using **Airflow**, managed experiment tracking with **MLflow**, and handled data/model storage using **MinIO**.

Customer Status Alert System (Production)

Conducted data analysis, cleaning, **SHAP-based feature filtering**, trained predictive models, and successfully **deployed the system to production**.

LLM Training Configuration

Customized and streamlined training

3.2. AI Research Engineer, Viettel Cyber Security | Dec 2023 – May 2025

Other Contributions & Learning

Focused on **self-learning**, **problem-solving**, Pretrained Language Models (PLMs), and participating in the **Viettel AIHub Competition**.

3.2. AI Research Engineer, Viettel Cyber Security | Dec 2023 – May 2025
